

The Boiler and Steam Specialist

Watertube boilers: fossil fuel- and biomass-fired up to 200 t/h and 350 t/h respectively and 110 bar, 540 °C.

Firetube boilers: coal/biomass-, oil-, gas-, and wood-fired up to 40 t/h and 32 bar.

Waste-heat boilers: steam output and pressure to suit application.

At John Thompson we design, manufacture, install, operate and maintain Industrial Watertube and Firetube Boilers for process steam and power generation applications.
